

With You

Josh Groban

Sometimes I remember reasons I let you go
Inside them I see your face and all I really know
I was scared to share the love I have inside of me
Through all the heartache I know that I was meant to be

With You
I have everything I've ever wanted
Simple and true
With You
Crying eyes so beautiful
It's You
Who always thought our love would see us through

If I could follow my heart again
it would be yours
With every breath I would find a way
to love you more
I can't imagine life without your silent bravery
And I'm grateful for every moment that I get to be

With You
I have everything I've ever wanted
Simple and true
With You
Loving eyes so beautiful
It's You
Who always finds a way

And if the stars should disappear
In the dark I'll still be here
Forever in your arms where I belong

With You
I have everything I've ever wanted
Simple and true
With You
Loving eyes so beautiful
It's You
Who always knew our love would see us through
