

Circles

Josh Todd

A camisole and secrets on your face
I finally got to you without a chase
You think that we could turn it upside down
And be the ones standing out in the crowd

We're going in circles stop if it makes you happy
If I lead you follow even if we take the long way
A shooting star is falling out of space
Wishing I could leave without a trace

I caught a glimpse of you and watched you cry
You always cry cause you keep it locked inside
I'm coming to take you away
We're going in circles stop if it makes you happy

If I lead you follow even if we take the long way
We're going in circles stop if it makes you happy
If I lead you follow even if we take the long way out
Wide-awake no way out We keep spinning around

Wide awake no way out, no way out
Love did you forget about love
Baby it all comes back to love
Did you forget about love

Baby it all comes back to love
Maybe I just threw it in your face
And now it's time you put me in my place
And now I'm running circles in my head

I saw you walking out and I saw red
I'm coming to take you away
We're going in circles stop if it makes you happy
If I lead you follow even if we take the long way

We're going in circles stop if it makes you happy
If I lead you follow even if we take the long way out
We're going in circles stop if it makes you happy
If I lead you follow even if we take the long way out

Even if we take the long way out
Even if we take the long way out
Even if we take the long way
