

# Turn Down The World Tonight

Journey

1. Caught up in the living... getting through each day  
When all your tomorrows become faded yesterdays  
Are you slipping away  
Blinded by schedules... rushing here and there  
Become strangers to each other... I miss you everywhere  
How did we get this way
- X: When the loneliness becomes too much to bear  
Get off this merry-go-round... tell each other we still care
- R: Help me turn down the world tonight  
Take a quiet moment somewhere we can unwind  
Losing touch... we forget to take time to share what's in our hearts  
Speak what's on our minds
- \*: In the silence hear your heartbeat next to mine  
Baby help me turn down the world tonight
2. So much information streaming at us fast  
What I really need to know is if we can make it last  
I wanna keep you close  
We make commitments... take responsibility  
Why do we let them come between you and me  
That's when I miss you most
- X: We gotta take this night... knowing our love won't wait  
Before our moment is gone... baby say it's not too late
- R: Help me turn down...
- \*: Far beyond the noise with your body next to mine  
Won't you help me turn down the world tonight
- R: Help me turn down...
