

She's out there shining like a diamond (out there shining like)  
Slipping under the horizon (slipping down under the)  
I'm staring off into the distance (staring blank into the)  
Listening to a little whisper (listening to a little)

Perched in a tree outside  
Chasing the smoke of a distant fire  
Making a screen in my mind  
Reciting the words of a lullaby

Don't be scared, I'm alive  
I'll be done and back in no time  
But golden hair, golden eyes  
Cut me down and watch me capsize

She's out there shining like a diamond (out there shining like)  
Slipping under the horizon (slipping down under the)  
I'm staring off into the distance (staring blank into the)  
Listening to a little whisper (listening to a little)

Don't be scared, I'm alive  
I'll be done and back in no time  
But golden hair, golden eyes  
Cut me down and watch me capsize

She's out there shining like a diamond (out there shining like)
