

Space Walk

Joywave

I have to see, through the glass, there's nowhere near enough f
or me
Short on battery, seems like the time, to take a walk in zero g
ravity

Is there anybody out there, I've come too far to go
Is there anybody here, never been so far from home
Is there anybody out there, another few miles to go
Is there anybody here, man, it'd just be nice to know

I find it hard, out in the dark, to breathe
Short on longevity, reaching for walls, that I can't see

Is there anybody out there, I've come too far to go
Is there anybody here, never been so far from home
Is there anybody out there, another few miles to go
Is there anybody here, man, it'd just be nice to know

'Cause all I'm thinking what the world is all about
All I've floating along through the sun
Falling into orbit with the satellites
Fall into a sea when I am done
(3x)
