

# Demonizer

Judas Priest

Born of the sun, crashed to the earth  
Tormented reviled, engorged hate from birth  
Hellions the steed, blood's on the wing  
Claws set to slice, vengeance he'll bring

Cremating the land in seek and destroy  
Apocalypse slays, napalm he'll deploy  
The beast of a god, eagled of his race  
Prepared to onslaught and bare face to face

Across the divide, the threshold's in flames  
The painkiller rises again

The scream of the demon, there's evil about  
They've come to possess us, out, demons out

Blade of the wheel cuts deep in the bone  
It's Gideon's quest to take Satan's throne  
The critical mass and power that they wield  
Exterminates all when vermin rebel

A maelstrom begins to disintegrate  
And pulverize all in it's wake

The scream of the demon there's evil about  
They've come to possess us, out, demons out

The scream of the demon, there's evil about  
They've come to possess us, out, demons out

Demonizer  
(Out, out, out, demons out)

Demonizer  
(Out, out, out, demons out)

Demonizer  
(Out, out, out, demons out)

Demonizer  
(Out, out, out, demons out)

Demons out
