

## Hell & Back

Judas Priest

I have roamed so far away  
I have found there's no turning back  
I have seen so many things  
I have been to hell and back

Still in the land of the living  
Rocking the home of the brave  
Staying alive and still kicking  
Ain't got no need to be saved

Out of the fire and into the black  
We've been through it all  
We've been to hell and back

When I was young life was savage  
The leather gets scruffed as it's worn  
Rolling alone you get damaged  
So you grab the bull by the horns

Out of the fire and into the black  
We've been through it all  
We've been through hell and back  
Take it up higher when you're under attack  
We've been through it all  
We've been through hell and back

We have roamed so far away  
We have found there's no turning back  
We have seen so many things  
We have been to hell and back

Out of the fire and into the black  
We've been through it all  
We've been through hell and back  
Take it up higher when you're under attack  
We've been through it all  
We've been to hell and back

We've all been under attack  
We've all been to hell and back  
We've all been under attack  
We've all been to hell and back  
We've all been under attack  
We've all been to hell and back  
We've all been under attack  
We've all been to hell and back
