## March of the Damned

We're walking the streets We know where we'll meet Can't stop us They don't know why they try Can't hurt us We'll never die We are on the march of the damned Of the damned March of the damned We know what's at stake Won't take your mistakes Can't break us We'll never fall, that's all It's over Just watch us grow We are on the march of the damned Of the damned March of the damned We're walking the streets We know where we'll meet Can't stop us They don't know why they try Can't hurt us We'll never die We are on the march of the damned Of the damned March of the damned
