

# Take On the World

Judas Priest

You got to leave your seat, gotta get up upon your feet  
Gonna move you to the rhythm till you never can stop  
We got the power, we got the music, and you bet your ... we can  
use it  
Gonna take rock bottom, gonna take it to the top

Put yourself in our hands, so our voices can be heard  
And together we will take on all the world  
Put yourself in our hands, so our voices can be heard  
And together we will take on all the world

Move a little nearer, you know you gotta follow your leaders  
As we need you, like you need us for sure  
We're gonna drive you, we're gonna ride you  
We're gonna get right inside you  
And if you wanna keep going, just shout out for more

Put yourself in our hands, so our voices can be heard  
And together we will take on all the world  
Put yourself in our hands, so our voices can be heard  
And together we will take on all the world

Sing your song, we'll listen to you  
Sing your song, the spotlights on you

Put yourself in our hands, so our voices can be heard  
And together we will take on all the world  
Put yourself in our hands, so our voices can be heard  
And together we will take on all the world

Put yourself in our hands, so our voices can be heard  
And together we will take on all the world  
Put yourself in our hands, so our voices can be heard  
And together we will take on all the world
