War

Judas Priest

Horsemen raised From the light Omens filled with dread Descreation I beheld A world of men gone mad The final age Comes to pass Apocalypse is here At last A call to arms The end to all Peace on earth no more We come in all The glory now No prayers suffice Such evil foe Black wings The storm is gathering And time will say We know The power of heresy Is on it's way Gods of war Heed their warning Gods of war They are coming now No man can quell The suffering The hell And all the grief It brings Our life is almost over No there's nothing more We feel the pain Is everywhere It comes and roars Gods of war Judge and jury Gods of war Pain and fury now We must hold this threat From such panic yet There will come a time When we'll be saved Our resilient heart To confound defeat Yeah Out of purgatory Unto victory We shall overcome The war they staged

Through unyielding power In the darkest hour They will retreat

Gods of war Devestation Gods of war End creation now
