

Heart of the Night

Juice Newton

Dark city streets, twist and moan in the heat as night descends
Two searching eyes, cut their way into mine inviting me in
Dancing so close, we already know how good it will be
We slip out from the unseeing crowd, we find what we need

In the heart of the night, we run like bandits
Two hungry hearts under the gun
In the heart of the night when we find each other
We're stealing love on the run
In the heart of the night, heart of the night

The cool city moon lays its touch on the room, your eyes reach
to me
Two shadows fall saying nothing at all, we know what we need
In the release two prisoners are free from all darkness
One more escape, surviving the heartache and madness

In the heart of the night, we run like bandits
Two hungry hearts under the gun
In the heart of the night when we find each other
We're stealing love on the run
In the heart of the night, heart of the night

In the heart of the night when we find each other
We're stealing love on the run
In the heart of the night, heart of the night
In the heart of the night, in the heart of the night
