

Crows

Julia Marcell

There are crows there by the river
There are crows there by the river
Late at night I lay and shiver
Late at night I never sleep

There are crows across the street
And there are crows across the street
And one day I am gonna meet them
One day I know they will see

There are crows behind my window
There are crows behind my window
They are watching all my sins grow
They are watching over me

Let's go be in love tonight
I'm gonna beat it down this heart of mine
I'm gonna shut the doors and windows tight
Turn on the light, no day no night, just right
Come on now

Don't look there, read my lips instead
They're only messing with your head
Don't listen to the things you've got
Reminding you of what you're not

Let's go be in love tonight
I'm gonna beat it down this heart of mine
I'm gonna shut the doors and windows tight
Turn on the light, no day no night, just right
Come on now

There are crows over my shoulder
There are crows over my shoulder
Feel their breaths are getting colder
When they're singing me to sleep
