

I don't feel like talking today  
The world's so loud and I need a pause  
This noise outside makes me  
Loose my breath  
This noise outside makes me  
Loose my voice

What's there in my soul  
You will never know  
What's inside of me  
You will never see  
What's my heart made of  
You will find out my love

I don't feel like talking this week  
My blood is so loud it won't let me speak  
That noise inside is a vicious thing  
A lullaby in my ears ring ring

What's there in my soul  
You will never know  
What's inside of me  
You will never see  
What's my heart made of  
You will find out my love

No I don't have anything to say  
What if I forever stay that way  
Words have failed me  
It's for them I'm lost  
How could they ever earn back my trust

What's there in my soul  
You will never know  
What's inside of me  
You will never see  
What's my heart made of  
You will find out my love
