

# Torpedo

Julian Cope

If I knew that there  
Was any other way to you  
I'd walk sound and miles  
Any other way got close to you

But you I could never share  
Oh I wouldn't have it any other way  
And everything I have to say  
Has probably been said many better ways

Sometimes I have you in my head  
And loving with you I am happy  
I think of things to say to you  
Of evenings respenting another place

And everything feels so good here  
Hand in hand in this other place  
The things I do make you stare  
Oh I wouldn't have it any other way

I sit alone and take care of my head  
Or the feelings that I have in front of me  
Changes that we could've made  
All the things we could've done together

But you I could never share  
Oh I wouldn't have it any other way  
And everything I have to say  
Has been probably been said many better ways
