

Everything Changes

Julian Lennon

Tired of this world, all the good that we do
Never seems to get through, it's a shame
We've pleaded for change but the wars carry on
Whether you're weak or strong, don't you know?

I can change, you can change
Everything wrong with our lives
We can change all of our lives

Everything changes everyday
We've got to find a better way
And on our hearts we've got to pray
For something better than today, everything changes

Tired of the lies, all the people in pain
We all suffer the same without love
We can't carry on with the hunger, disease
And the threat of you dropping the bomb

I can change, you can change
Everything wrong with our lives
We can change all of our lives

Everything changes everyday
We've got to find a better way
And on our hearts we've got to pray
For something better than today

Everything learned from history, can't you see?
Life is meant to be you and me
Watching the sun go down
Turning your life around

Everything changes everyday
We've got to find a better way
And on our hearts we've got to pray
For something better than today

Everything changes
Everything changes
