## Keep Me Up All Night

**Julie Roberts** 

Be my hot pot of coffee, baby, Keep me up all night A full moon through my window shining A little too bright Baby, remember what it's like Keep me up all night

Be my alley dog barking at the breeze That won't let me sleep Sometimes a lack of shut eye Is just what a body needs Baby remember what it's like Keep me up all night

Let's Outrun the sandman Forget about the time Cast that old spell on me Just by looking at my eyes We'll light a little fire And watch the sparks fly We may be a little sleepy Come the sunrise Oh, remember what it's like Keep me up all night

Be my summer church tent revival Lead me back to the light Let the spirit move us, Hallelujah When we get it right I swear by tomorrow morning, I won't mind Keep me up all night

Let's Outrun the sandman Forget about the time Cast that old spell on me Just by looking at my eyes We'll light a little fire And watch the sparks fly We may be a little sleepy Come the sunrise Oh, remember what it's like Keep me up all night
