

## Over It

Junior Boys

Baby baby hope is for the middle of the night  
But hope is fading with the first sign of the city light  
And I'm staying with it baby  
Keeping out of sight  
And I'm praying for us baby  
Put your little fire out at night yeah  
Sures and maybes  
Better than a quick alright  
Cause you're passing crazys  
And you're feeling like you're living in a street fight  
And we're bound to fall apart  
Before it even starts  
After everything I've read  
It's better if you have a single bed

The night is gone but you're afraid to go home  
The night is gone but you're afraid to go home

Baby baby  
Seeing you would be too much  
I got so crazy  
Found a new place to forget your touch  
And I'm digging up the eye [?]  
Now that I'm feeling sure  
I lost that to the dirt  
It won't be felt it won't be felt it won't be felt

The night is gone but you're afraid to go home  
The night is gone but you're afraid to go home

So come on back down town my love  
It's better when you're around my love, no  
Come on now

The night is gone but you're afraid to go home  
The night is gone but you're afraid to go home  
The night is gone but you're afraid to go home  
(Don't hurt me, don't hurt me)  
The night is gone but you're afraid to go home  
(But don't hurt me)  
But you're afraid to go home  
But you're afraid to go home  
(I'm over it)  
But you're afraid to go home
