

Wrong Place, Right Time

Junior Doctor

Here we go again
Obligation's pulling me around
Take a breath and then
Dive in a sea of people that just keep dragging me down
Because when I arrived I saw you look me in the eyes
I know you know what I have in mind

I say we ditch on this party
But baby that don't mean we can't have a real good time
Follow me girl, I guarantee
I will show you the time of your life

I'm sure I'm probably the last guy here you wanted to see
But I know and you know you love the way I make your scream
Why don't we set aside our past, and baby don't try to hide
How badly you want me

I've been running so long that I don't even feel the pain
And I've been running so long, so long from you
Whoa, oh whoa, oh whoa oh, oh whoa
