

Come On

Jupiter One

Oh, I said everything I wanted to
I said everything I didn't want, too
But I meant every word
But I know that underneath that sad, sad girl
Is a woman of the wide, wide world
'Cause I've seen her before
Come on, come around
'Cause you know too much to be down
Come on, come around
You've been through too much to be down down down
So come on, you've been in bed for days now
And I've tried so many ways now
To get you back on your feet
And I know you know you'll feel better if you
Hear the truth from me
I could try to put it gently but I'll be ignored again
So come on, come around
'Cause you know too much to be down
Come on, come around
You've been through too much to be down down down
You shouldn't say it's a curse
You shouldn't claim that you have it worse
Than anybody else 'cause you never try
No you never even try
