

Find Me A Place

Jupiter One

Find me a place where the wind never blows
And I'll kiss you again
And I'll kiss you again
Under the tree on the side of the road
And I'll love you again
I'll learn to love you again
All the magic
It was so suddenly a different shade of blue
Call it tragic
The only thing I had was the memory of you
All the worries were buried inside a deeper part of me
These are chapters in the saddest story
When I met you
You were the only song I'd ever want to sing
When I touched you
I couldn't think of any better place to be
But when I missed you
It's the only time I felt a part of me
That was living its life that's meant to be
