

Something In That Mess

Justin Currie

Sometimes I love you
Sometimes I hate you
I know you struggle too
It's in your nature

'Cause you and me
Were never meant to be together
But you took off your dress
And something in that mess got changed forever

Some days a breakthrough
Some days a breakdown
When I fall out to love
You meet me on the way down

'Cause you and me
Were never meant to be together
But you took off your dress
And something in that mess got changed forever

Forever stains and scratches
Written on the leather
And when the sun comes sliding in
I swear it's raining feathers

'Cause I can't find myself among
This stuff we're throwing together
'Cause somewhere here a shirt of mine
Is twisted in the arms of your sweater

And sometimes I love you
And sometimes I hate you
And I know that you do too
It's in your nature

'Cause you and me
Were never meant to be together
But you took off your dress
And something in that mess got changed forever, forever
