Blue Velvet Sea

Justin Nozuka

It happened one warm summer night The wind and rain collided right Below the stars and fell all over me

I saw it all before my eyes How she used the grey to twist the sky And the flash of light to cut the running sea

And on top of the hill where god sits on his throne A gentle giant wave appeared and took him down below

Take me on

As the wave came close I tried to flee But it swept me right off my feet And a gentle touch pulled me down below

There were dolphins dancing everywhere

And mermaids with red glowing hair And god shone on his throne like the sun

Passing wisdom trees filled with golden leaves I could feel the warmth of a perfect melody

Take me on

Blue Velvet Sea

Overhead twelve fairies flew And lit the sky green, red and blue And the stars rearranged just for you

Take me on
