

Only the Dark

K.Flav

Ease my aching mind, it's only nature, making things unwind
Still I wanna stay right here in the moment
When nothing is broken, and every thing silent is suddenly spoken
And nobody has to change

Promise when you go, you'll sleep with the stars
Remember when the lights dim down
It's only the dark

The end is just the start
(The end is just the start)

Hold my hand and say that nobody's sure if all this goes away
Still, every thing that we believed in was worth it
And even uncertainty, it has a purpose however imperfectly
I'll never forget your face

Promise when you go, you'll sleep with the stars
Remember when the lights dim down
It's only the dark

The end is just the start
End is just the start
(The end is just the start)
Start

Fly back soon and tell me what it's like
And I'll look for your letters in the sky
Believing isn't easy but I'll try
For you, anything for you

I promise when you go, you'll sleep with the stars
Remember when the lights dim down
It's only the dark
Promise when you go, you'll sleep with the stars
Remember when the lights dim down
It's only the dark

The end is just the start
The end is just the start
(The end is just the start)

The end is just the start
Remember when the lights dim down
It's only the dark
