

Lay Down Your Weapons

K Koke

Lay down your weapons, weapons to me
That means everything

Listen little manner, done told you for the hype thing
I done told you roll life in what it might seem
Where I'm from we do wrong for the right green
But out price can loose your life for some nice things
No nice dreams, just fiends inside veins
No lie, you don't wanna hear my scream
It's cold nights, got us sippin like an ice drink
My bro light, you gonna hear like lightning
My 4 thug killin me, imprisoned with the lifeless
Darling listen, can you vision where my mind is?
It's life sick and that leads to a livewire
Friends turns bitch I know you heard about spider
I recommend you take the tale from me
Cause I've been in it from the start dog,
It's hell in these streets
Once you in it, then you in it, ain't no sailing in beat
Lay down your weapons, get money

Lay down your weapons, weapons to me
That means everything
Can we avoid war, search and destroy all
Learn what to live for, that means
Lay down your weapons, weapons to me

Defeat flags, looks one, well look a little closer
You just might find this life isn't what you hoped for
of life, and the proof's in the culture
The truth is you die or sit down, no sofa
Prison living is the image you don't know bout
Picture living in this prison and it's so dark
And when you listen you hear whispers from the cold draft
Looking in the mirror, like a sinner with a broke heart
I know it's so hard, I hope it won't last
I know you and you just wanna get your dough fast
But you don't wanna end up dead or stuck behind bars
Time is of the essence and the prison flies past
and die hard kids wanna play with guns
Listen to my voice, can you hear my pain
Before there isn't choice

Lay down your weapons, weapons to me
That means everything
Can we avoid war, search and destroy all
Learn what to live for, that means
Lay down your weapons, weapons to me
That means everything, that means anything.
