Miss You, Goodbye

K. Michelle

I miss you in the day I miss you in the night I miss the way we used to dump But I don't miss your lies

I miss the way we laughed You used to make me smile Maybe you'll see When we can't be And then you'll come around

I need your love I need enough You left me out and dry In my angry pride It don't hurt no lie Miss you, but goodbye

I I wish that you could change But I don't think you can I wish that you could feel this pain So you could understand

I hate you're not the one I hate you more Cause my path ain't meant for 2 But I sleep here alone

I need your love I need enough You left me out and dry In my angry pride It don't hurt no lie Miss you, but goodbye

And I hold on to the night And I pick up when I'm down But I wanna you I wanna you

If there's any hope My head's there Let it go My heart says: why we fall in love? Why we fall in love? But I'm giving up

I need your love I need enough You left me out and dry In my angry pride It don't hurt no lie Miss you, but goodbye
