

## Legacy

KadavriK

We have nothing to fear but fear itself  
This is the war we fight alone  
This is the war we fight alone  
Hell abandoned-all the demons are here  
Winding through the entrails that we own

Purify me from the first born's legacy  
Rescue me and one day I'll be free

I travel to the inside  
Where nemesis awaits  
There is no place to hide  
And it's lurking in the shades  
A hundred times he kills me  
And gains the upper hand  
But if I win I'll get the key  
To my promised land

Lust for revenge, the urge takes over  
This is the war we fight alone  
This is the war we fight alone  
How can I build up a core of resistance?  
Strengthen me to endure what I see

Purify me from the first born's legacy  
Rescue me and one day I'll be free

I travel to the inside  
Where nemesis awaits  
There is no place to hide  
And it's lurking in the shades  
A hundred times he kills me  
And gains the upper hand  
But if I win I'll get the key  
To my promised land
