Until You

Kalan Porter

I didn't think I was missing much at all Wasn't prepared for love Wasn't ready for the fall

But now I've found you Everything's changed Come summer, spring or winter My love will stay the same

Now I believe in this love I'm living You brought me to life with the love You're giving Never knew love could be so true Until you

Captivated in a space Brought from far to a brand new place You showed me things I never thought could exist I don't remember what life was like before we kissed

Now that I found you Everything's changed

[Chorus]
