## **Dance Of The Water**

Water in eternal movement Circling day after day Above the surface in wind's face Is the end cruelly grimaced On the water, water lily's leaf Is rolling on the stream Beside the bluff there she dances Water flea in her wedding Master wind blows waves begin to rise

Her fiance tomorrow child Just taken his first breath Take his step and with his bride They fall into ecstasy Wind blows hard they do not see Water lily's leaf is turning With this move it falls down Those lovers almost together Lose their lifes for the others to live Today it is calm Tomorrow it storms But still water For ever flows
