

# Watching Over You

Kari Kimmel

Hope seems lost, you're so scared  
Not sure which way to go  
Nothing makes sense  
It's un familiar and you're feeling all alone

I'm closer than you think  
I'm there when you're asleep  
When you've falling down  
Every second you're awake  
Every moment, everyday  
Call out to me now

Don't have to say a word, whichever way you turn  
Don't have to worry, I'm watching over you  
I'm never far away, don't have to be afraid  
Look up I'll always be watching over you

I'm right here even when it seems I'm so far out of reach  
Take my hands, I got you safely in my arms  
Hold on to me

'Cause I'm closer than you think  
I'm there when you're asleep  
When you've falling down  
Every second you're awake  
Every moment, everyday  
Just call out to me now

Don't have to say a word, whichever way you turn  
Don't have to worry, I'm watching over you  
I'm never far away, don't have to be afraid  
Look up I'll always be watching over you

I'll protect you from the storms  
When the wind and rain is falling all around you  
Oh, I'm just a star away  
Close your eyes and you will see,  
That I've already found you

Don't have to say a word, whichever way you turn  
Don't have to worry, I'm watching over you  
I'm never far away, don't have to be afraid  
Look up I'll always be watching over you

Don't have to say a word, whichever way you turn  
Don't have to worry, I'm watching over you  
I'm never far away, don't have to be afraid  
Look up I'll always be watching over you
