

Battle Forevermore

Kari Rueslåtten

I believe it was you who came to my door
I said I met you before
It was only a lie to make you feel strong
Now I long for those days

I could fight you forevermore
Or let this be the ending for sure
I decided to say no one will win

It's a battle forevermore
It won't go away like before
We have chosen to live like enemies
We have no future in this

Countless nights with my churning thoughts
Now I bid you farewell
I will take back the spells
Erase the joy
Still I long for those days

I could fight you forevermore
Or let this be the ending for sure
I decided to say no one will win

It's a battle forevermore
It won't go away like before
We have chosen to live like enemies
We have no future in this

No future in this...
Have no future in this...
