

Light Up A Candle

Kasey Chambers

You call me baby with that look in your eye
A poster child for the mojo fly
You click your fingers and they fall at your feet
Well I'm drivin' home but it ain't your street
I won't be cryin' in the middle of the night
No countin' sheep and the bugs won't bite
Fresh as a daisy when I wake up in the morn
It wasn't yesterday that I was born

Light up a candle and let it burn out
You say forever and I say for now
It's not a wheelin' and dealin'
Its just feelin you out
And baby I don't need you around

Well you say your loves as deep as a bottomless hole
Your promise you'll keep until your blood runs cold
You'll tell me I'm the only one in your world
But I know you say that to all the girls

Light up a candle and let it burn out
You say forever and I say for now
It's not a wheelin' and dealin'
Its just feelin you out
And baby I don't need you around

Light up a candle and let it burn out
You say forever and I say for now
It's not a wheelin' and dealin'
Its just feelin you out
And baby I don't need you around

No baby I don't need you around, no baby I don't need you around
