Don't Wait

Crazy how you can run away Lookin' out for a better day Can you decide What you're feelin'?

Don't wait to take what's there And then make it what you want All that you need to have Is right there inside your heart

No need to look around When you could be lookin' in You say you'll find You will find it

Love is here and will always stay It's you who chooses to look away You can decide What you're feelin'?

Don't wait to take what's there And then make it what you want All that you need to have Is right there inside your heart

No need to look around When you could be lookin' in You say you'll find You will find it

Make it what you want Make it what you want

Don't wait to take what's there And then make it what you want All that you need to have Is right there inside your heart

No need to look around When you could be lookin' in You say you'll find You will find it

Don't wait to take what's there And then make it what you want All that you need to have Is right there inside your heart

No need to look around When you could be lookin' in You say you'll find You will find it
