

## Will I Arrive

Katatonia

Bypassed the day I can hear them coming  
They walk round my door and speak of their coming  
My trial awaits got nowhere to run  
My only words how soon you have come

And I think about what you told me  
When I was about to join in

Defy only if you have a way to resist the lies  
Decline only if you have the intention of taking this advice  
Apply only if you're not afraid to see your spirit die  
Retreat only if you dare not hear yourself say goodbye

Who brought me here this place is familiar  
Where houses are black under the sun  
Strangers pass on streets with strange names  
All I can think is how soon they have come

Look at me now they have cut my hair  
It's a long way back  
They kicked me down and I could not rise  
I will never arrive
