

Light in the Dark

Kate Ryan

Even when the darkness falls
When you think you've lost it all
Inside of us there's always a shining star
No matter where we are - Oh-ooh

You don't have to be alone
You were never left behind
So don't you put out the glow

See the light in the dark
Don't you run from the shadows in your mind
Take a look in your heart
Don't be scared of the answers you will find

You will never know
If you never - you never - you never try
'cause the dreams you hold
They will never - will never - will never die

Take a look in your heart
See the light in the dark

Even at the end of days
It will never be too late
To turn around 'cause you'll always find your way
No matter what they say - Oh-ooh

You don't have to be alone
You were never left behind
So don't you put out the glow See the light in the dark
Don't you run from the shadows in your mind
Take a look in your heart
Don't be scared of the answers you will find

You will never know
If you never - you never - you never try
'cause the dreams you hold
They will never - will never - will never die

Take a look in your heart
See the light in the dark

Even when the darkness falls
When you think you've lost it all
Inside of us there's always a shining star
No matter where we are - Oh-ooh
