I don't know what to do
But stare into space
Wish I could shut my eyes
I used to sleep at night
I used to feel safe
But now I'm terrified

So take away this darkness in the air It's like black flames are everywhere Someone say there's hope on the way

Oh can you shake it down on the sea and rain down the water Make it count can't you see our hearts will break it harder Rain down, rain down the water Rain down, rain down the water Have you heard us screaming out?

We're burning the harbor

We took a holy place We taught it violence And called it efficiency, oh We've seen the hell it creates But we've chosen silence And kept it viciously, yeah

So take away this darkness in the air It's like black flames are everywhere Someone say there's hope on the way

Oh can you shake it down on the sea and rain down the water Make it count can't you see our hearts will break it harder Rain down, rain down Rain down, rain down the water Have you heard us screaming out?

We're burning the harbor

Maybe we need a second chance Maybe it's out of our hands Maybe it's time we take a stand

Oh can you shake it down on the sea and rain down the water Make it count can't you see our hearts will break it harder Rain down, rain down the water Rain down, rain down the water Have you heard us screaming out?

Oh whoa oh, can you shake it down on the sea and rain down the water Make it count can't you see our hearts will break it harder Rain down, rain down the water Rain down, rain down the water Have you heard us screaming out?

We're burning the harbor

I say we're burning the harbor You know we're burning the harbor
