## **A Little More Free**

## **Katelyn Tarver**

Sorta been a two way street But you never walked my way I gave you my everything But you didn't do what you should've done And left me halfway

So much for sticking it out Guess it doesn't matter now No difference with or without

'Cause I was Never a part of your group so I'm gonna push on trough it You think I'm missing out on you But I'll show you what I can do

So thanks for giving up on me Turns out it's just what I needed To be A little more free

I never slowed my pace Too scared of being erased Can't be here running in place So you can keep it Hear this I don't need your name

So much for sticking it out Guess it doesn't matter now No difference with or without

'Cause I was Never a part of your group so I'm gonna push on trough it You think I'm missing out on you

But I'll show you what I can do

So thanks for giving up on me Turns out it's just what I needed To be A little more free

You took me up and down You took me 'round and 'round Yeah, you made me dizzy then You let me hit the ground

So now I'm moving on This ain't where I belong Watch me now I prove you all wrong

Never a part of your group so I'm gonna push on trough it

You think I'm missing out on you But I'll show you what I can do

So thanks for giving up on me Turns out it's just what I needed To be A little more free

A little more free A little more free

So thanks for giving up on me Just what I needed A little more free
