

# Feather

Katharine McPhee

I still dream  
Even though my heart is heavy  
The world, it got unsteady  
Ooh, I can see  
A little hope on the horizon  
I know the sun will rise for me

I can ride the ups and downs  
My feet don't touch the ground  
Since your breeze blew into town  
Now...

You got me floating, floating  
Light as a feather  
You got me going, going  
Light as a feather

I don't care  
If i get hit with a cold rain  
I let it flow like champagne  
Bubbles in my brain

And I  
Keep you by my side, we're sailing  
Leave a couple glitter trails in the sky

I can ride the ups and downs  
My feet don't touch the ground

You got me floating, floating  
Light as a feather  
You got me going, going  
Higher than ever

And I'm never coming down, never coming down  
Never coming down, never coming down  
Woah

You got me floating, floating  
Light as a feather

Glide, fly  
Effortlessly  
Don't have to try  
It comes naturally

I'm gliding, flying  
Effortlessly  
Don't have to try  
It comes naturally  
With you

Got me floating, floating  
Light as a feather  
You got me going, going  
Higher than ever

And I'm never coming down, never coming down  
Woah

You got me floating, floating  
Light as a feather

Feather, feather  
Dancing like a feather, feather

Feather, feather  
Dancing like a feather, feather
