

Six O'Clock News

Kathleen Edwards

Copper on the corner and he loaded two rounds
And I can't even get inside to talk you down
Peter, sweet baby, where'd you get that gun?
You spend half your life trying to turn the other half around

And I tried to come clean, but I guess it's no use
Your face is all over six o'clock news
They cleared the street and then they closed the schools
I can't even get inside

Did you lose your head when the farm went down?
Was is when your daddy died after he moved to town
And I know your momma calls you good for nothing
She says her baby is a failer and she don't want you calling

Peter, sweet baby, there's something I need to say to you
Gonna have your baby this coming June
We could get a little place down by Gilmour park
You could do a little time and save my broken heart

And I tried to come clean, but I guess it's no use
Copper when ahead and he just shot you through
Now you're lying dead on the avenue
And I can't feel my broken heart
