R:

- R: Joy is in the ears that hear Let it's song succeed Laughter is the bane of fear And all the hope we need
- 1. Let all who are most serious And fearful on this day Take lessons from our Giant friends Or children at their play For ever in the midst of woe It helps if we recall That laughter is a medicine More potent than them all
  R:
- 2. When all our banners dragged the dust And all our hands were chained In haunted caverns of the earth Our laughter yet remained And ever as we lost our dreams The joy would bid them nigh Until at last we left the dark And laughed beneath the sky
- 3. Though ever in this darkling world
  Our enemies grow strong
  It helps us to remember
  That their reign cannot be long
  And though it seems forever
  As we hold them still at bay
  It helps to know that laughter
  Is forever and a day
