

## Sister-wife

Kathy Mar

Sister-wife, you turn away  
And close your eyes to all my speaking  
Though you've come to love our way  
You think there's something else you're seeking  
Though you've grown to need this bond  
You think it's something you must sever  
You must learn to look beyond  
The love you give goes on forever

Sister-wife you know we love you  
Cherish you in all our ways  
Faithful as the stars above you  
There beside you all your days  
Come along and fear no evil  
For our love is sure and true  
Here with us you'll find no devil  
Only others just like you

Sister-wife our way of living  
May seem strange and so unreal  
But set aside your own misgiving  
And look at how you really feel  
And you may find your love is here  
Where all of us are waiting still  
So set aside your needless fear  
And see how soon your heart can fill
