

# Shadow Love

Katie Costello

Single wishing flower on my lawn  
New freckle on the moon's face  
Closed eyes saw new grace  
Go to sleep blue eyes and wake me when I'm dreaming  
Close your lips real tight  
Let me kiss them while you're sleeping

It's fool's gold when you realize  
Your love was a shadowy bear  
It's your child, your baby, your safety  
You love them when you can't find your love

Let us just lay here until the record can't go 'round no more,  
Even if the room is all but dark, those blue eyes light my own  
I don't know how I know, but I need to run away from your shadow love  
I forgot what was dear to me, your shadow love is treachery

Something in the way you kiss me goodnight  
The warm night air wraps around me tight  
Something in the way the quiet room speaks  
I find the music loud, that precious sound

It's fool's gold when you realize  
Your love was a shadowy bear  
It's your child, your baby, your safety  
You love them when you can't find your love

Let us just lay here until the record can't go 'round no more,  
Even if the room is all but dark, those blue eyes light my own  
I don't know how I know, but I need to run away from your shadow love  
I forgot what was dear to me, your shadow love is treachery

The streets are ours to dance in  
The waves are ours to dive  
The sky is for our wishing stars  
Dreams so that kiss will survive  
But the shadows still blind your eyes  
From the love outside the lines  
Of the shadowy prize

It's fool's gold when you realize  
Your love was a shadowy bear  
It's your child, your baby, your safety  
You love them when you can't find your love

Let us just lay here until the record can't go 'round no more,  
Even if the room is all but dark, those blue eyes light my own  
I don't know how I know, but I need to run away from your shadow love  
I forgot what was dear to me, your shadow love is treachery
