

Drug

Katie Herzig

Oh you left me with a little of your love, your love
Oh I'm gonna need some more, I need some more love, some more love
Oh you left me in the middle of your love, your love
Oh and now I need some more, you're like a drug, a drug

Heaven must have sent you because I never meant to meet you
Heaven must have sent you because I never meant to meet you
Heaven must have sent you because I never meant to

Oh I'm taking it to everywhere I go, I go
Oh and now you need to know, you need to know, to know
Oh you kill me when you say you have to go, to go
Oh addicted to you baby even though my lord, oh my lord

Heaven must have sent you because I never meant to meet you
Heaven must have sent you because I never meant to meet you
Heaven must have sent you because I never meant to
