

Fool's Gold

Katie Herzig

From the time you said Hello and What's your name?
You were a work of art, play me like a little game
Now you can break my heart, and I will love you just the
same

I can see it through your eyes,
Your fingers crossed by your side
But I need your little shiny lies

You promised the world and opened up your door
And the words you fed me left me wanting more
And now I'm left here locked out looking for a key to
score

I can see it through your eyes,
Your fingers crossed by your side
But I need your little shiny lies

Fools gold shining
Fools gold shining
Fools gold shining
Fools gold shining

You can break my heart and I will want you just the same
I can see it through your eyes
Your fingers crossed by your side
But I need your little shiny lies

You can break my heart and I will love you just the same
I can see through your eyes
Your fingers crossed by your side
But I need your little shiny lies
