

# Fools Gold

Katie Herzig

From the time you said hello and what's your name  
You were work of art playing me like a little game  
Now you can break my heart and I will love you just the same

I can see through your eyes  
Your fingers crossed by your side  
But I need your little shiny lies

You promised the world and opened up your door  
And the words you fed left me wanting more  
Now I'm left here locked out looking for a key to score

I can see through your eyes  
Your fingers crossed by your side  
But I need your little shiny lies

Fools gold shining...

You can break my heart and I will want you just the same  
I can see through your eyes  
Your fingers crossed by your side  
But I need your little shiny lies  
You can break my heart and I will love you just the same  
I can see through your eyes  
Your fingers crossed by your side  
But I need your little shiny lies
