

# Walk Through Walls

Katie Herzig

How do you know the world is round  
When you're blissfully enchanted on the ground  
How do you see a world outside  
When you're surrounded by a picture in your mind  
When I saw your eyes they stole my heart  
And they told me I was living in the dark  
And now I'm caught in a great divide  
And I'm aching to be on the other side

But before you walk through walls  
You will leave all this behind  
Before you walk through walls  
You will look it in the eye  
Before you walk through walls  
You will learn to say goodbye  
If you let your guard down long enough to try

How do you know a flame is real  
Out of all the fires this is one I feel  
They happen so fast  
The moments pass  
And we're all waiting for the moments that will last  
When I saw your eyes they stole my heart

Before you walk through walls  
You will leave all this behind  
Before you walk through walls  
You will look it in the eye  
Before you walk through walls  
You will learn to say goodbye  
If you let your guard down long enough to try

Before you walk through walls  
You will leave all this behind  
Before you walk through walls  
You will look it in the eye  
Before you walk through walls  
You will learn to say goodbye  
Before you walk through walls  
You will look it in the eye  
Before you walk through walls  
You will learn to let it die  
In the moment where the darkness needs the light
