

## Your Side

Katie Herzig

We felt love so we made it  
We felt hope so we braved it  
We felt fear so we tamed it  
We held on and we waited

From the fire to the fear to the fall  
Heaven knows I'm on your side  
From the first to the last through it all  
Everywhere our worlds collide

Oh oh  
We can't hide from each other  
We can hide from no one  
Oh oh  
Give our hearts to each other  
Lift them up like we're young

When we lived in the moment  
We forgot all our shame  
When we woke in the morning  
We knew then we are the same

From the fire to the fear to the fall  
Heaven knows I'm on your side  
From the first to the last through it all  
Everywhere our worlds collide

Oh oh  
We can't hide from each other  
We can hide from no one  
Oh oh  
Give our hearts to each other  
Lift them up like we're young
