

# Calm Down

Katy B

When are we ever going to calm down?  
Know I should do, but I love the sound  
All I really wanna do is dance  
My lover, keeps asking when I'm gonna leave and get home  
Now I'm far too caught up in the song  
All I really wanna do is dance

There's this thing that I feel called joy when I free myself  
Why would I want to toy when my [?]  
Leave me alone now boy, by now can't you tell?  
All I really wanna do is, yeah

Get down down, down down, down down, down down  
Down down, down down, down down, down down  
Down down, down down, down down, down down  
Down down, down down, down down, down down

When are we ever going to calm down?  
Know I should do, but I love the sound  
Higher than a bird of prey, I fly  
See my lover's gon' be mad with me in the morning  
See the day already dawning  
Watch the colors seep into the sky, sky

There's thing that I feel called joy when I free myself  
Why would I want to toy when my [?]  
Leave me alone now boy, by now can't you tell?  
All I really wanna do is, yeah

Get down down, down down, down down, down down  
Down down, down down, down down, down down  
Down down, down down, down down, down down  
Down down, down down, down down, down down

It's too late, it's taken all control now  
Taken all control of me  
It's too late, it's burrowed in my soul now  
Deep down, deep down  
Fills this space, without it I'm so hollow  
I'm so empty  
It's too late for thinking 'bout tomorrow

So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)  
So keep calm (down down, down down, down down, down down)
