

# Danger

Katy B

You better think this through, you better take your time  
Is that what you really want, giving away what's mine?  
Don't insult my intelligence, you know I ain't one of them girls  
Who'd turn a blind eye, believe you, better not trip over your words

Danger danger I see the thick black smoke  
I see the bright red flame  
Burning our love away, ain't that such a shame, oh  
Danger danger I see the bright red fire  
I see the thick black cloud  
Smoking our love away, I'm about to put it out, oh

It almost makes me smile that you could be so naïve  
I know you far too well, so I now know what to believe  
You got it twisted here if you think I'm gonna stick around  
I'll be ghost, disappear so fast leaving you to figure it out

Danger danger  
I see the thick black smoke  
I see the bright red flame  
Burning our love away, ain't that such a shame, oh

Danger danger  
I see the bright red fire  
I see the thick black cloud  
Smoking our love away, I'm about to put it out, oh

Yeah, you pass my love to the left hand side  
Smoked it right down to the roach  
So I might as well put it out  
So I might as well put it out

Yeah, you pass my love to the left hand side  
Smoked it right down to the roach  
So I might as well put it out  
So I might as well put it out

Danger danger  
I see the thick black smoke  
I see the bright red flame  
Burning our love away, ain't that such a shame, oh

Danger danger  
I see the bright red fire  
I see the thick black cloud  
Smoking our love away, I'm about to put it out, oh
