

Play

Katy B

Play me, pull my strings
Bring out a melody in me
Hear heart, it signs
All these words I need to say to you softly
Call my name
The plot shifts and I'm at your mercy
So say it say it, say it again
I'm hungry for this sound, from the one thing I'm close to

Am I a dreamer? Am I insane?
And all these colors keep dripping through my brain
It's more than they're worth, it's more than words
The melody played with places on my heart

(2x)
Play, play
Play me those melodies
Play, play
Play me those melodies

Hit me, play my keys
Show me what is this I'm feeling
100 harmonies come together, am I still dreaming?
Your lullaby lives in my brain
Wake me before I gotta leave and
So say it say it, say it again
So I know it's you, yea so I can believe it

(2x)
Play me, those memories
And I'll play you, these melodies
In my mind, knocking over a shooting star
We were meant to collide

We were meant to collide (4x)

(2x)
Play, play
Play me those melodies
Play, play
Play me those melodies
