

The Sun

Kazaky

You don't see me
Now I'm far away
You don't feel me
Now I'm not like yesterday
Time goes back
Leaving a trail of nowhere
We rush forward
Like stars falling from nowhere

Now you see
I'm with you was just for you
Now you hear
So I'm still here it's true
Lets take look
Deeply in each others eyes
Where we are
Bounded from the very start

Be cause cause cause cause
We where from that side
Where was born the sun

Be cause cause cause cause
We where from that side
Where was born the sun

Be cause cause cause cause
We where from that side
Where was born the sun

Be cause cause cause cause
We where from that side
Where was born the sun

You didn't let me say, I know
That all of this is just for you
You turned away from me, I know
And forgot it, was, you to call me though
I don't want to ask the why
Because I know the answer, don't cry
I don't want to ask you how
What has been done is done
So

Be cause cause cause cause
We where from that side
Where was born the sun

Be cause cause cause cause
We where from that side
Where was born the sun

Be cause cause cause cause
We where from that side
Where was born the sun

Be cause cause cause cause

We where from that side
Where was born the sun

A harsh wind is taking my thoughts far away
I feel as fall leaf torn off from the hanging tree
No more I will get back to you that past way
That's you who'll reach me taking off from land free

No more I will get back
Me taking off from land free
No more I will get back
Me taking off from land free
No more I will get back
No more I will get back
No more I will get back
No more I will get back
No more I will get back
No more I will get back

From that side
Where was born the sun
Where was born the sun

From that side
Where was born the sun
Where was born the sun
